

## ALLOW YOUR DREAMS TO GUIDE YOU

*I am too busy. What if I fail? What will my friends think? I cannot sell. I am not good enough.* These are only a few of the doubts and fears that can keep you from realizing the potential you have for success through Arbonne. If you are being drawn by the little voice of hope inside you to read this story, then you understand. Which will you follow: The loud sound of fear or the quiet whisper of your hopes and dreams? I can guarantee this: Whichever you listen to will greatly affect where you find yourself one or two years from now.

Two years ago, I had no idea that an invitation to try Arbonne skin care products was going to change my life; or that this would lead me to blessings so abundant that I had never even considered them possible. The decision I made to seize this opportunity made all the difference in my life. Consider your dreams for a moment; now imagine them becoming true and multiplied by 10! These are the gifts that await you if you believe and take action.

At about 13 years of age, I knew I wanted to be a geologist. At the same time, I also knew that when my skin was not at its best, it could be painful. I grew up with eczema all over my face and body, as well as typical teenage acne problems. I remember asking myself, If a genie gave me one wish, what would it be? I realized my wish would be to have new and different skin. Unfortunately, rubbing bottles yielded no genie.

Eventually, my first dream came true, and two weeks before the birth of my second son, I graduated with a Ph.D. in Geochemistry from the University of Texas. I found myself at the beginning of the career I had dreamed about and worked at for 20 years, but this dream

could not compete with the two precious boys that had since blessed my life. I realized that fulfilling my life-long professional goals might bring me career satisfaction and financial resources, but at the same time, it would take away my freedom to raise my boys. I was forced to decide between the two freedoms. I chose to be a mom rather than a scientist and left my career in geology to raise my boys. At the time, I really believed having both financial and time freedom at the same time was impossible ... and then I found Arbonne.

## success strategy:

“ Focus on your dreams, rather than your doubts and fears, and watch your life transform. ”

After spending much time and energy trying many different skin care products, and not getting the desired results, I personally experienced amazing improvement in my skin with the Arbonne skin care products. Seeing both the products and business as gifts, I jumped right into the business and never looked back. Yes, there were times of doubt and frustration along the way, but giving up was not an option because I made a conscience choice to listen to my dreams rather than my fears. Thank goodness! It has made all the difference in my life today. I am living a life now that is a direct consequence of the choice I made two years ago. What about you? What are the choices you are making today that will affect your future? Are they based on hope and belief, or fear and doubt? You have the power to turn that around right now if you believe and take action.

I have been enriched by so many strong and close relationships around this business and I am truly thankful.
